**FIA Standard FT3-1999 safety fuel tanks**

**Information regarding an error on the FIA labels on CARL products**

Dear Sir or Madam,

We would like to inform you of an error that has been made on the FIA labels of CARL products. It concerns FT3-1999 safety fuel tanks fitted on rally cars in categories R3, R5 and in the WRC.

CARL is kicking-off a recall campaign to retrofit all labels in order to bring them back into compliance with FIA labelling guidelines.

Figure 1: Current incorrect labelling

Figure 2: Correct FIA labelling

In the meantime, some cars may be presented for scrutineering during competitions with the incorrect label, as shown in Figure 1. Even though the label has not yet been updated, the fuel tanks do conform to FIA Standard FT3-1999.

The exact list of fuel tanks with incorrect labelling has been established for 52 units, the serial numbers of which are detailed in the attached appendix 1.

We remain at your disposal for any further information you may require.

Yvan DEVIGNE
