The minimum distance between the adjacent rear wing sections at any longitudinal vertical plane was checked on car number 11.

It was confirmed for car number 11 that any vertical cross section of bodywork normal to the car centre line and situated in the volumes defined in Article 3.5.7 form one tangent continuous curve on its external surface with a radius no less than 75mm.

The concave radius of sections of the two rear wing elements which are in contact with the external air stream was checked on car number 11.

The front and rear brake air duct dimensions were checked on car number 11.

It was checked that no car exceeded 80 km/h when leaving the formation grid prior to the start of the race.
