The FIA Formula One Race Director

2024 AUSTRIAN GRAND PRIX

28 – 30 June 2024

From The FIA Formula One Race Director

To All Officials, All Teams

Date 28 June 2024

EVENT NOTES V2 (changes in light blue) General Instructions

1) Observing yellow flags

- 1.1 Single waved: Drivers reduce their speed and be prepared to change direction. It must be clear that a driver has reduced speed and, in order for this to be clear, a driver would be expected to have braked earlier and/or discernibly reduced speed in the relevant marshalling sector.
- 1.2 Double waved: Any driver passing through a double waved yellow marshalling sector must reduce speed significantly and be prepared to change direction or stop. In order for the stewards to be satisfied that any such driver has complied with these requirements it must be clear that he has not attempted to set a meaningful lap time. Furthermore, during qualifying, any driver in a double yellow sector will have that lap time cancelled.
- 1.3 Double Waved during VSC or SC: Any driver passing through a double waved yellow marshalling sector during a VSC or SC, in addition to the requirements in 1.2 above, must remain positive of the SECU delta time in the sector concerned.

2) Laps during Sprint Qualifying, Qualifying and Reconnaissance Lap(s) for the Sprint or Race

Teams and Drivers will be informed of the maximum time after the first practice session.

For the safe and orderly conduct of the Event, other than in exceptional circumstances accepted as such by the Stewards, any driver that exceeds the maximum time from the Second Safety Car Line to the First Safety Car Line on ANY lap during and after the end of the sprint qualifying or qualifying session, including in-laps and out-laps or during reconnaissance laps when the pit exit is opened for the sprint and the race, may be deemed to be going unnecessarily slowly. For the avoidance of doubt, this does not supersede Article 33.4 and Article 37.5 of the FIA Formula One Sporting Regulations, which apply to the entire Circuit, furthermore this includes the pit lane as well. Incidents will normally be investigated after the sprint qualifying, qualifying session, sprint or the race.

3) Parc Fermé

The Parc Fermé cameras must be always uncovered and operational during the Event.

4) Lapping during the Sprint and the Race

The ISC requires drivers who are caught by another car to allow the faster driver past at the first available opportunity.

The F1 marshaling system will be set to give a pre-warning when the faster car is within 3.0s of the car about to be lapped, this should be used by the team of the slower car to warn their driver he is soon going to be lapped and that allowing the faster car through should be considered a priority. When the faster car is within 1.2s of the car about to be lapped blue flags will be shown to the slower car (in addition to blue light panels, blue cockpit lights and a message on the timing monitors) and the driver must allow the following driver to overtake at the first available opportunity.

5) **Article 55.14**

“In order to avoid the likelihood of accidents before the safety car returns to the pits, from the point at which the lights on the car are turned out drivers must proceed at a pace which involves no erratic acceleration or braking nor any manoeuvre which is likely to endanger other drivers or impede the restart”.

6) **Article 40.8**

In accordance with the provisions of Article 40.8, upon request by the Technical Delegate, the Teams are required to connect the umbilical to the cars and close the HV contactors (TR 5.26.5) for the sole purpose of checking the car ERS safety status, every morning immediately after the covers are removed and the cars are under parc fermé conditions.

Event Specific Instructions

7) **FIA Outside Scales Times**

Should the outside scales be set-up at the pit-lane entrance, these will be available for teams to use at any time outside the curfew times and the Parc Fermé cover-up times, except for the 30 minutes preceding the start of the Sprint Qualifying session or Qualifying session and if there are support competitions using the pit lane.

8) **Specific Technical Procedures**

Please note that the FIA have introduced an Appendix Index File which contains all the relevant and active Appendix documents, Technical and Sporting Directives. The latest version of this Index file (“**2024 Formula 1 Appendix – iss 1 – 2024-01-15.xlsx**”) and all relevant documents can be found on the FIA SFTP site.

Competitors are hereby required to ensure compliance with these directives for the safe and orderly conduct of the Event.

9) **Support Races team barrier placement and Movements**

Team barrier placement prior to and during all support category practice sessions and races: On the white line, no more than (2) two meters from the the garage.

It is not permitted to push cars to the weighing area at any time a support category is in the pit lane.

Support Crews and Trolleys will be released into Pit Lane no earlier than 20 minutes prior to the opening of Pit Exit for their respective sessions.

Support Category competition vehicles will be released from the marshalling area no earlier than 15 minutes prior to the opening of Pit Exit for their respective sessions.

10) **Practice starts**

No practice starts may be carried out at the pit exit.

11) **Article 34.8 SR**

(...) Any car(s) driven to the end of the pit lane prior to the start or re-start of a free practice session, qualifying session or sprint qualifying session must form up in a line in the fast lane and leave in the

order they got there (...)

It is noted that a car will be considered to be “in the fast lane” when a tyre has crossed the solid white line separating the fast lane from the inner lane, in this context crossing means that all of a tyre should be beyond the far side, with respect to the garages, of the line separating the fast lane from the inner lane.

For the avoidance of doubt, ISC Appendix L, Chapter IV, Article 5b) states that:

Once a car has left its garage or pit stop position it should blend into the fast lane as soon as it is safe to do so, and without unnecessarily impeding cars which are already in the fast lane.

Thus, after the start or re-start of a free practice session, qualifying session, or sprint qualifying session, if there is a suitable gap in a queue of cars in the fast lane, such that a driver can blend into the fast lane safely and without unnecessarily impeding cars already in the fast lane, they are free to do so.

Furthermore, it is noted that during a free practice session, qualifying session, or sprint qualifying session a car driving in the inner lane, parallel to the fast lane, will not be considered to have blended into the fast lane at the earliest opportunity.

Additionally, ISC Appendix L, Chapter IV, Article 5d) states that:

Cars in either the fast lane or working lane may not overtake other cars in the fast lane except in exceptional circumstances.

In this context a “stopped car” is one which has an obvious mechanical problem.

12) Lines at the Pit Entry and Pit Exit

12.1 In accordance with Chapter 4, Article 4 and 6 of Appendix L to the ISC drivers must follow the procedures at pit entry and pit exit.

12.2 For safety reasons drivers committed to entering the pit lane, must keep to the right of the white line preceding the pit entry which starts approximately 50m before turn 9.

Except in cases of force majeure (accepted by the Stewards), the crossing by any part of any wheel, in any direction, of the white line prior to the pit entry or of the painted area, between the pit entry and the track, by any driver who, in the opinion of the Stewards, had committed to entering the pit lane is prohibited.

- 12.3 If any part of a car has crossed the dashed line at pit entry, the car is considered to have entered the pit entry road.

13) **Post-Qualifying drivers weighing**

Any driver who finished participating in the sprint qualifying sessions or qualifying sessions after SQ1, SQ2, Q1 and Q2 must proceed through the pit lane directly to the FIA scales immediately after they have returned to their team's garage. The drivers may not drink anything or do anything which increases their weight before it is recorded by the FIA.

Any driver, who stops on the track during the qualifying sessions and is not required to visit the Medical Centre, must proceed to the FIA scales to get his weight recorded before returning to his team.

Drivers who finish within the top 10 must proceed to the FIA scales immediately when out of their cars without contact with any other person.

14) **Post-Sprint Parc Fermé**

For the safe and orderly conduct of the Event, all Teams are requested to ensure they have three (3) mechanics per car available within the Parc Fermé area, or at the gate to the grid in the case of a car finishing in the top three, directly after the Sprint. As soon as a car is weighed and/or checked, it will be released to the Team mechanics, it must be immediately put on the trolley boards and returned to the Team garage. The car must stay on the trolley boards inside the garage with the wheels fitted until it is notified via the official messaging system that all cars have been weighed and/or checked and Parc Fermé Conditions are lifted. Work on all cars may only be started following such notification via the official messaging system.

15) **DRS**

DRS Detection will be automatically disabled in each individual zone if any of the light panels in that zone are displaying yellow. The zones and corresponding light panels are as follows:

- a) DRS Activation 1: Panels 3, 4, 5, 6
- b) DRS Activation 2: Panels 7, 8, 9
- c) DRS Activation 3: Panels 16, 1, 2

16) **Track Limits**

In accordance with the provisions of Article 33.3, the white lines define the track edges. During Sprint Qualifying, Qualifying, Sprint and the Race, each time a driver fails to negotiate with the track limits, this will result in that lap time being invalidated by the Stewards. Additionally, each time a driver fails to negotiate the exit of turn 10, will result in that lap time and the immediately following lap time may be invalidated by the Stewards.

17) Unsafe or Unknown ERS Status

If the status of the ERS changes to unsafe or unknown, the relevant team will be required to send mechanics to the gate next to the race control tower as indicated in the pit lane drawing. They will then be driven to their car with a race control car.

18) Fire extinguishers around the circuit

Indicated by white boards with a red fire extinguisher attached to the debris fences.

19) Places to remove cars from the track

Indicated by fluorescent orange panels/paintings on the barriers.

20) Removing cars from the grid

Cars may be removed from the grid through grid positions 1 and 12.

21) Race Suspension

In case of a race suspension, cars will be stopped in the fast lane of the pit exit lights.

22) Car number light panels for the start

On the right-hand side of the grid. Team equipment must stay clear off the panels to avoid any damage.

23) Changes to the Circuit

- The verge behind the kerb in Turn 8 on RHS has been removed.
- A 2.5m wide gravel strip has been installed directly behind the kerb at exit of Turn 9 and Turn 10 on LHS. Additionally, the white line has been moved to the left to reduce the distance between the white line and the gravel to 1.5m.
- The white line in Turn 1 and Turn 3 on LHS has been moved to the left to reduce the distance to the yellow sausage kerb.
- The white line in Turn 4 on LHS has been moved further to the left to reduce the distance between the white line and the gravel to 1.8m.
- The white line in Turn 6 on RHS has been moved further to the right to reduce the distance between the white line and the gravel to 1.8m.
